

VISITOR

Registration System

Eliminate tedious manual process
Easy Check-in and Check-out
Powerful tracking feature

AUTOPACK is proud to present this most comprehensive software on the market with a powerful tracking feature. This software allows company to produce Visitors' badges on adhesive labels that is valid for the day of visit for security

TRAK IT 

Features

Easy Check-In and Check-Out

Visitor scans in NRIC or Passport number. If it already exists in database, it will retrieve visitor's information automatically.

Automatic Check-Out

Situations where visitors forgets to scan out, the system will automatically check out after 5 days (default, can be amended)

Advance Printing and Re-print of badge

Badge layout will be customized and printed to card or label or paper printer

History Listing/Reports

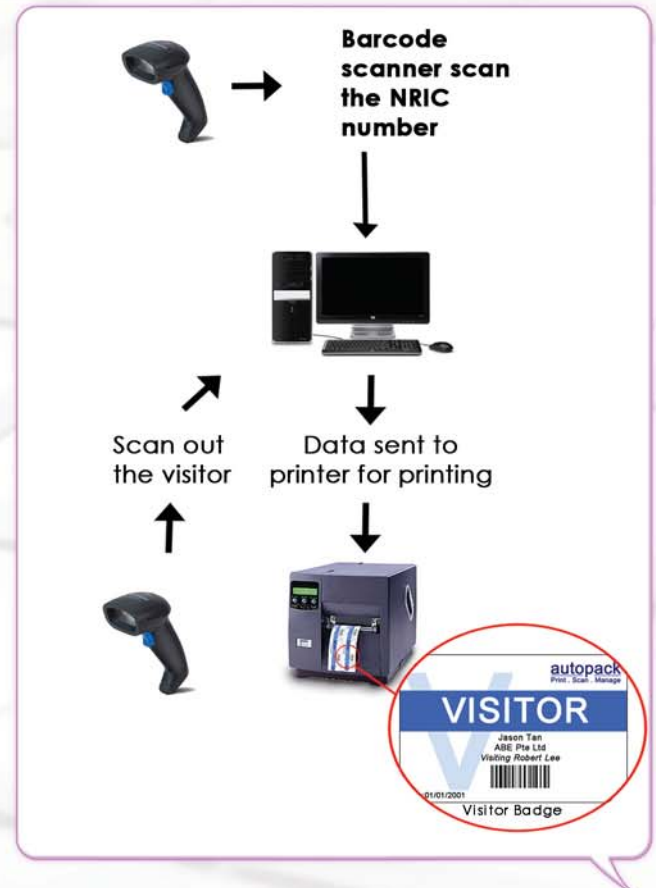

There are strong functions to allow user to search/filter the history information of visitors. System can be filtered by pending logout, Name (Visitor), NRIC (Visitor), HOST NAME, DATE_IN, Type of visitor. System allows to print reports with this filtering data. This software generates visitor's detail report, a summary report, and also visitors pending logout report.

System Security

This software offers password security which only authorized personnel can access through.

VISITOR Registration System

Basic Flow Diagram

Screen Capture

The screenshot shows the 'VISITOR REGISTRATION SYSTEM' interface for 'DEMO COMPANY'. It features two main sections: 'VISITOR'S INFORMATION' and 'HOST'S INFORMATION'. The 'VISITOR'S INFORMATION' section includes fields for 'Type' (Visitor/Contractor), 'NRIC/Passport No.', 'Name', 'Company', 'Email (Opt)', and 'Tel /HP No.'. The 'HOST'S INFORMATION' section includes fields for 'Host's Name' and 'Host's Department'. A 'DATE AND TIME' section shows 'Date' as 12/03/2010 and 'Time' as 3:17:11 PM. At the bottom, there are buttons for 'Update', 'Clear All', 'Print Badge', 'History', and 'QUIT'.
